

As Science & Technology Advance, Continuing Education is Key.

TiP-EdSM Online provides continuing education for imaging professionals that can help your staff meet the challenges of advancements in science and technology.

Peak performance of your staff significantly impacts the quality of patient care. Your department contributes to each patient's diagnosis or treatment challenging your staff to keep their knowledge base and skills current.

TiP-Ed Online helps contribute to your staff's continuing education requirements including:

- Basic imaging techniques and procedures
- Disease specific imaging techniques and procedures
- Updates on new equipment technology
- Radiation safety and dose reduction

TiP-Ed Online offers more than 350 accredited programs on timely topics and on the most recent imaging technologies. With featured segments from industry experts and demonstrations of the latest procedures and techniques, we can help your staff meet the challenges of advancing technology.

Radiation Safety & Dose Management

Radiation safety and dose management associated with medical imaging are important in the healthcare environment. Efforts to manage dose for pediatric and adult patients are essential. In an effort to help support best practices, TiP-Ed Online has developed radiation safety and dose management education programs.

Leadership

In addition to modality specific programming, we've developed Leadership programs designed for leaders of diagnostic imaging departments. This results-oriented series focuses on the challenging issues confronting today's imaging department directors, administrators, supervisors and other team leaders.

Leadership and Radiation Safety and Dose Management courses are included in full and modality specific subscriptions.

TiP-Ed Online can help:

- Recruit and retain staff
- Optimize staff's skills
- Increase staff's productivity
- Improve patient care

TiP-Ed Online supported modalities:

- Computed Tomography
- Interventional
- Magnetic Resonance
- Mammography
- Molecular Imaging
- Radiology
- Ultrasound

Easy to use.

Available online, TiP-Ed Online provides anytime, anywhere access making it convenient to obtain continuing education credit.

Our learning management system makes TiP-Ed Online effortless to use. Within the learning management system, you can:
