Caring for the newborn.
Centricity Perinatal from GE Healthcare

Enhanced communication, documentation, and workflow in the Nursery.
By expanding the information available in the Nursery, Centricity Perinatal helps improve communication among caregivers and streamline workflow. Centricity Perinatal captures comprehensive patient data and makes it available when and where it is needed to support efficient and effective care of newborns.
Getting off to the right start.

Centricity Perinatal helps provide the information necessary to ensure newborns get off to the best start possible.

From making delivery information available immediately to capturing critical clinical data to creating discharge summary and instruction sheets, Centricity Perinatal helps caregivers provide better care in the Nursery. By putting more information at caregiver’s fingertips, Centricity Perinatal helps to increase direct care time. In supporting connectivity to enterprise healthcare IT solutions, Centricity Perinatal becomes part of the larger, integrated electronic health record for both mum and baby.

Mother-Baby Link

Upon arrival in the Nursery, the information necessary to initiate proper care for the newborn is readily available. No more tracking down information from clinicians to complete the infant record.

The Mother-Baby Link allows critical maternal history and delivery data to flow directly to the infant record. Maternal charts and respective infant charts remain separate medical records, but share relevant information. Data can also be entered manually and updated as necessary.

Interfacing

Inbound/ADT, Lab, and Outbound HL7 interfaces provide seamless connectivity to other enterprise IT systems to foster interoperability and data sharing. This makes relevant information available to the teams who need it, while providing one location for documentation supporting the perinatal continuum of care.

Efficient Documentation

Documentation is efficient and reduces redundant charting that can lead to transcription errors and discrepancies in patient data. Centricity Perinatal supports the flow of information with one-time data entry. Combined data
review and data entry screens allow providers to document physical exams and narrative notes, while viewing relevant documentation from the midwife, all in a single screen.

Using the Forms Copy feature, pediatricians can copy and edit daily progress notes and physical exams with a single click.

The Infant Discharge Summary is updated following delivery of the infant to help ensure information is available and is complete prior to infant discharge.

**Pediatrician and Nursery Views**

A variety of view options allow users to quickly navigate to the information they need. Enhanced forms and easy access to information pertinent to the Nursery help to improve multidisciplinary care team communication. The delivery attendance form allows pediatricians to view details of the time of delivery, including the team members present and any other necessary interventions. Comprehensive lactation forms help support the needs of disciplines frequently involved in the care of mum and baby. Other forms including ones for circumcision and pain help standardise common procedure documentation in the Nursery.

**Alerts & Reminders**

Integrated Alerts & Reminders notify clinicians of outstanding tests to be completed or out-of-range parameters. This function provides sites with a toolset for defining their clinical policies and procedures.

**Compliance**

Centricity Perinatal helps with regulatory requirement compliance established by the industry and care protocols established by your facility.
About GE Healthcare

GE Healthcare provides transformational medical technologies and services that are shaping a new age of patient care. Our broad expertise in medical imaging and information technologies, medical diagnostics, patient monitoring systems, drug discovery, biopharmaceutical manufacturing technologies, performance improvement and performance solutions services helps our customers to deliver better care to more people around the world at a lower cost. In addition, we partner with healthcare leaders, striving to leverage the global policy change necessary to implement a successful shift to sustainable healthcare systems.

Our "healthymagination" vision for the future invites the world to join us on our journey as we continuously develop innovations focused on reducing costs, increasing access, and improving quality around the world. Headquartered in the United Kingdom, GE Healthcare is a unit of General Electric Company (NYSE: GE). Worldwide, GE Healthcare employees are committed to serving healthcare professionals and their patients in more than 100 countries.
